

# photo frame

Create your own exciting photo frame for your favourite picture.

What you need:

- Thick Cardboard
- Texta Liquid Glue
- Strong Glue
- Coloured Crepe Paper
- Glitter Glue
- Texta Markers

What you need to do:

Choose the photo you would like to frame. Place it on the cardboard and cut out to double the size of the photo, leaving a border of at least 5cm around the photo.

Colour your frame with Texta markers and decorate it by gluing little squashed pieces of coloured crepe paper in the shape of your own designs - use Texta liquid glue for this as the crepe paper needs to get wet in order to create the best effects. Once all the decorating is done, leave to dry.

Then use the strong glue to stick the photo into the frame and glue together.

Finally attach a small piece of strong cardboard to the back of your frame as a stand.

colour it ... with Texta
